

Dear Sir/Madam,

Stakeholder Involvement - Centre for Clinical Practice:

Please be aware that stakeholder registration for the following additional topics is now available to a maximum of two contacts from directly affected, national organisations:

• Anxiety • Autism in children, young people and adults • Children and young people with cancer • Faecal incontinence • Heavy Menstrual Bleeding • Mental wellbeing of older people in care homes • Metastatic spinal cord compression • Neonatal jaundice • Peripheral vascular disease

The Institute is committed to involving national organisations that represent patients or professionals in the development of clinical practice guidance. In order to participate fully, however, an organisation must register as a stakeholder for a specific topic.

If your organisation wishes to register as a stakeholder for any of these topics, please complete the form on our website:

http://www.nice.org.uk/ourguidance/niceguidancebytype/clinicalguidelines/shregistration/shreg_form.jsp

Please note that the names of all organisations registered as stakeholders for each topic will be posted on the NICE website. The full contact details of registered stakeholders will also be sent to the team(s) undertaking the development of the guideline for which they have registered so that the organisations can be contacted during the development of the guideline.

We will continue to write to tell you about each new programme of guideline topics. If you would like us to remove your name from our database please email guidelines@nice.org.uk with your details.

To ensure that NICE is able to send you relevant updates, please keep us informed of any change in contact email address.

Please also find attached some current developments within the guideline programme which may be of interest.

Many thanks and kind regards,

Andrew Gyton
Guideline Coordinator
