

Venn Healthcare is the **FIRST** company in the UK to provide a full day **FOCUSED Shockwave Therapy** training course. **THIS ONE DAY COURSE IS OPEN TO MEDICAL PRACTITIONERS WHO WANT TO EXPLORE THE CURRENT EVIDENCE BASE AND PRACTICAL APPLICATION OF FOCUS SHOCKWAVE TECHNOLOGY IN MSK DISORDERS OR FOR PRACTICES THAT HAVE JUST BOUGHT A STORZ MEDICAL FOCUSED SHOCKWAVE DEVICE.**

Shockwave is not just for tendons...

Focus shockwave is the true shockwave technology, with wide application in multiple MSK pathologies. Focused shockwaves are able to penetrate deeper into the tissues and provides all of its power at the designated depth, unlike radial devices. These shockwaves are generated electromagnetically through a cylindrical coil creating opposing magnetic fields when current is applied. Treatments that require targeting tissue at a deeper level such as tissue close to bone, calcifications or delayed unions and non-unions benefit from focused shockwaves. Patients who are unable to tolerate radial treatments for acute injuries will also benefit from Focus shockwave. Find out the differences between Radial and Focused Extracorporeal Shockwave Therapy (ESWT) and how Focused Shock waves can treat advanced tendinopathies and bone stress conditions.

SCHEDULE

9.15 am: REGISTRATION

9.30 - 12.45 pm LECTURE & PRACTICALS:

Focused Shockwave Therapy (Theory & Current Evidence) - Working principles and biological effects - Shockwave Demonstration and Practicals - Dosage, Indications and Contra-indications

12.45 - 1.15 pm: LUNCH BREAK

1.15 - 4.15pm LECTURE & PRACTICALS:

Application of Focused Shockwave beyond common tendinopathies lecture & Wider scope of pathologies Practical session - Case Studies 4.15 - 4.30pm: Q&A

HEAD OF TRAINING AND EDUCATION AT VENN HEALTHCARE:

BENOY MATHEW, MSc, MCSP Ben is a UK Chartered Physiotherapist specializing in overuse lower limb injuries. A master's graduate from the University of Hertfordshire, he's currently working as an extended scope practitioner in London for the NHS. As an ESP Physiotherapist, he is involved in management of complex cases and requesting investigations including MRI, Xrays and ultrasound and onward referral to orthopaedics or rheumatology, if appropriate. He also provides injection therapy and shockwave therapy for suitable patients as part of their rehabilitation. Benoy has more eighteen years of experience in the field of exercise therapy and rehabilitation and is also a clinical tutor on chronic Hip and Groin & Running courses in the UK for health care professionals and fitness trainers. More than 1300 therapists have attended his CPD courses, over the last 5 years, both in the UK and internationally. (Twitter: @function2fitnes Private Practice: www.harleystphysio.co.uk)

SHOCKWAVE THERAPY FOR A WIDER SCOPE OF PATHOLOGIES

22ND JANUARY 2022
LONDON

26TH FEBRUARY 2022
LONDON

16TH APRIL 2022
LONDON

28TH MAY 2022
BIRMINGHAM

10TH DECEMBER 2022
LONDON

more to be confirmed...

£75
(incl. VAT)
BOOK ONLINE

LEARNING OUTCOMES

- Overview of Focus Shockwave technology
- Indications, Contra-indications and Safety
- Difference and Benefits of Focus vs Radial
- Practical application of Focus Shockwave in conditions like Insertional tendinopathies, bone stress injuries, spinal conditions, etc
- Brief overview of Non-MSK indications (Men's health, Pelvic Health, etc.)

6 CPD Points awarded through Faculty of Sports Exercise and Medicine (FSEM).
