

CSP Accreditation of Qualifying Programmes in Physiotherapy: Quality Assurance processes

Section 1: Conditions for programme accreditation

CSP programme accreditation normally extends for a 5-year period, subject to the programme provider's continued engagement with the CSP (see below). However, the point at which a programme is presented for re-accreditation can be negotiated (again as described below).

In addition to the payment of the Society's annual accreditation fee, ongoing CSP programme accreditation requires programme teams to

- Provide information about each cohort of students who enrol on the accredited programme (through completion of the CSP enrolment list pro forma), student interruptions or withdrawal from the programme, again, using the relevant CSP form, and pass lists as students graduate (All forms can be found within CSP Programme Leads Handbook (2011).)
- Participate in the CSP annual quality review process
- Present their programme for review and re-accreditation every four to seven years (with the most appropriate point within this time identified through discussion between the programme provider and CSP, taking account of an institution's broader plans for reviewing and developing its health care education provision).

The CSP's requirements attached to programme accreditation are listed below.

CSP accreditation is dependent on

- A programme also securing approval from the HCPC
- Enrolled students being strongly encouraged to take up CSP membership
- Engagement with CSP annual quality review processes
- The host institution making appropriate arrangements for inducting and supporting all those involved in a programme's delivery in the university and practice environment
- Upholds and promotes the values bound up in the concept of professionalism (see *CSP Code of Professional Values & behaviour (2010)*)
- Is normally overseen by external examiners who hold HCPC registration, at least one of which is a chartered physiotherapist.

Section 2: Learning and Development Principles, Supplementary information for CSP Accreditation of Qualifying Programmes in Physiotherapy

This section details the underpinning quality assurance processes that support the principles on which physiotherapy qualifying programmes should be based in order to obtain Chartered Society of Physiotherapy accreditation.

Both the processes and the principles are intended to help course providers develop their programmes to prepare learners for emerging physiotherapy roles that meet changing healthcare needs, and for practice within an evolving context, for example within new health and wellbeing providers.

The following table itemises CSP requirements for programme accreditation and re-accreditation.

This table is used by CSP representatives at accreditation events. Should you wish to do so; it can be used to map your programme against and be included within submission documents for programme accreditation.

The table is divided into the following themes based on the learning and development principles

- Programme outcomes
- Programme design
- The learning process
- Learning, teaching and assessment strategies
- Interprofessional education
- Practice placements
- Models of practice
- Research, critical evaluation and appraisal
- Resources and programme management

This table is available as a standalone document and can be found on iCSP closed SH/PL network. Alternatively please contact the Education Adviser on learninganddevelopment@csp.org.uk.

Principle 1 Programme Outcomes

Qualifying programmes should aim to develop the knowledge, skills, behaviour and values (KSBV) required to practise physiotherapy at newly qualified level (NHS Band 5 or equivalent), while nurturing the skills, behaviour and values that will enhance career-long development and practice.

Area	Recommendation	
Learning outcomes	<p>The programme's learning outcomes should be ensuring that the KSBV required of a new graduate are effectively developed through the course. An explanation of how the graduates meet the KSBV articulated within the <i>CSP Physiotherapy Framework (2010)</i> should be given (a summary of these can be found in the following table). This could take the form of a mapping exercise.</p> <p>An explanation should be given of how the learning outcomes are consistent with the programme's philosophy and rationale.</p> <p>Where a programme is designed to lead to a Master's level award, it should clearly be articulated how the programme enables students to develop and demonstrate their learning at this level</p>	

Principle 2 Programme design

Flexibility and local need will determine programme design decisions, within nationally agreed boundaries.

Area	Recommendation	
Admissions	<p>Information should be provided on</p> <ul style="list-style-type: none"> • How individuals apply for admission (eg through UCAS) • Minimum academic entrance criteria • Mechanisms for considering applicants with appropriate prior learning for advanced standing on the programme • Policies of the host institution and that are individual to the programme or physiotherapy/health and social care provision to do with mature and non-standard applicants • Selection procedures, including <ul style="list-style-type: none"> - Their rationale - Protocols for clear and timely communication with applicants at all stages of the process - Mechanisms for ensuring fairness and consistency in procedures - Arrangements for monitoring application and selection trends and the selection of procedures • How the selection procedures comply with the Disability Discrimination Act (1995) and Disability Equality Duty (2006) and government initiatives on widening access to higher education, and fulfil the CSP code of practice for equality and diversity (CSP, 2004b; HCPC, 2006) • The institution's policies on health checks and police checks of applicants (CSP, 2006b) • How the selection processes take account of professional and regulatory expectations relating to suitability for preparing to practise within a healthcare profession (CSP, 2010) 	
Attendance requirements	The programme's mandatory attendance requirements should be explained and itemised.	
Context	Information should be provided on relevant additional programmes offered by the institution, including other qualifying programmes in physiotherapy, learning opportunities for qualified physiotherapists and support workers, and its broader profile of health and social care provision	
Individual modules	<p>The following information should be provided on each module within a programme:</p> <ul style="list-style-type: none"> • Pre-requisites and co-requisites • Year of study in which it is delivered • Credit-point tariff 	

Area	Recommendation	
	<ul style="list-style-type: none"> • Contact hours • Aims and intended learning outcomes • Indicative content • Teaching and learning strategies • Assessment strategies • Indicative reading 	
Ongoing evaluation	<p>Information should be provided on the structures, mechanisms and processes the team has in place for evaluating all aspects of a programme's delivery and for gaining the perspectives of all relevant parties.</p> <p>In particular, information should be provided on how the following aspects of a programme's development and delivery are kept under review:</p> <ul style="list-style-type: none"> • How the programme is ensuring that graduates are appropriately prepared for contemporary and future physiotherapy practice and service delivery needs • How the programme continues to fit within the education providers' profile of physiotherapy and other health and social care education (at qualifying, post-qualifying and support worker levels) 	
Philosophy and rationale	<p>The programme's educational and professional rationale, philosophies and theories should be explained, together with how</p> <ul style="list-style-type: none"> • These have informed the programme's planning, development (and delivery and evaluation, in the case of programmes presented for re-accreditation) • The programme will meet current and anticipated needs in physiotherapy practice and service delivery • How service user views have informed the development of the programme • The programme will support the development of students' professionalism. 	
Programme aims	The programme's aims should be articulated and explained.	
Programme structure	<p>A diagrammatic representation should be provided of the curriculum, set against a calendar, showing semesters, practice placement blocks, university blocks, units/modules and assessments.</p> <p>The programme structure, including how this supports the curriculum design and the integration of academic and practice-based components, should be explained</p>	
Staff:student contact	An indication should be given of the staff:student contact hours for each year of study	

Area	Recommendation	
Student Consent	<p>Information should be provided on requirements and guidelines on student consent for involvement in elements of the programme (CSP, 2005b). The CSP expects host institutions to have a non-discriminatory protocol on consent for students' engagement in practical and clinical skills work as part of their enrolment on a programme. This can usefully be provided as part of the programme documentation.</p>	
Programme-specific requirements	<p>The regulations specific to the award should make explicit that</p> <ul style="list-style-type: none"> • Condonement of failure in a module should not normally be permitted • Compensation of failure may be permitted within a module that is not related to practical skills • Condonement or compensation cannot take place in practice-based learning elements of a programme • It is not normally permitted that a student can proceed from one year or level of a programme to the next without having successfully completed all the pre-requisites for the following year or level • It is not normally possible for a student to be permitted more than two attempts at a unit/module; such a regulation should be applied with discretion, taking account of <ul style="list-style-type: none"> - A student's progression through the programme (ie a team should keep under review whether a pattern is emerging of a student needing to re-attempt units or modules, with particular attention paid to issues of public protection that an individual's performance may raise, and the practicalities of a student progressing from one unit to another if the need for a second attempt arises) - Extenuating circumstances that may impact on a student's performance • Aegrotat awards are not acceptable for providing eligibility for CSP membership. <p>Information should be provided on</p> <ul style="list-style-type: none"> • The minimum pass mark • Re-assessment, including how this is organised [see above] in terms of how a re-sit can be accommodated within the programme calendar and arrangements for student progression, the particular arrangements for the final-year students to be re-assessed, and arrangements and conditions for requiring students to re-do a period of learning • The contribution of each year or level of study to the final award • The percentage contribution of practice-based learning elements to the final award (the CSP expects this to be commensurate with practice-based learning forming a significant portion of a programme) <p>Alternative awards (for which 'physiotherapy' should not be included in the title and for which it should be made clear that eligibility for CSP membership does not apply)</p>	

Area	Recommendation	
	<p>Period of study: A BSc (Hons) programme should normally be completed within a maximum period of six years, and an MSc (Pre-reg) within four, unless a robust rationale is presented for ensuring the quality and currency of students' learning over a longer period</p> <p>Some discretion will be applied in applying this requirement, informed in part by the length and mode of study of the programme in question).</p>	

Principle 3 The learning process

The learning process experienced by students should prepare them well for initial practice upon qualification, to promote continued learning and enable them to adapt to the challenges and opportunities of an ongoing career in physiotherapy.

Area	Recommendation	
Ongoing evaluation	<p>Information should be provided on the structures, mechanisms and processes the team has in place for evaluating all aspects of a programme's delivery and for gaining the perspectives of all relevant parties.</p> <p>In particular, information should be provided on how the following aspects of a programme's development and delivery are kept under review:</p> <ul style="list-style-type: none">• How the programme is optimising links between practice, research, teaching and learning	
Research component	<p>The following information should be provided:</p> <ul style="list-style-type: none">• Explanation of how the research component of a programme enables students to develop and demonstrate the application of a chosen research method, the analysis and interpretation of data and discussion of results achieved and methodology used, and broader skills to do with the critical analysis and evaluation of the outcomes of work• Rationale for the format and assessment of the assignment/project• Procedures and academic support provided to students• Arrangements for standardising marking• Marking criteria• Practical arrangements for managing the impact of research ethics and governance processes on students' ability to complete research-based assignments.	

Principle 4 Learning, teaching and assessment strategies

Learning, teaching and assessment approaches should be adopted that facilitate the development of high level cognitive skills.

Area	Recommendation	
Assessment board arrangements	Information should be provided on the constitution and terms of reference for the assessment board	
External examiner arrangements	<p>Information should be provided on arrangements for ensuring that the profile setting, conduct and outcome of the programme's assessment processes are appropriately overseen by the external examiners appointed to a programme to ensure that academic and professional standards are upheld.</p> <p>It is normally expected that a programme is overseen by two external examiners who hold HCPC registration, at least one of which is a chartered physiotherapist. Where cohort size is small and it is normal practice for only one external examiner to be appointed, this should be a Chartered Physiotherapist.</p>	
General Regulations	Information should be provided on the institution's general assessment regulations that pertain to the programme.	
Methods	<p>An explanation should be given as to how the chosen assessment methods complement the learning and teaching process and enable students to demonstrate their fulfilment of the learning outcomes.</p> <p>Information should be provided on arrangements for offering alternative assessment methods for some students (eg students with a disability).</p>	
Moderation	Information should be provided on how students permitted to undertake alternative methods of assessment are subject to rigorous, consistent, fair and transparent processes.	
Schedule	<p>A chronological plan should be provided of the elements that contribute to the formal assessment of students' learning, including coursework, written and practical examinations, and clinical assessment.</p> <p>An explanation should be provided of how the outcome of each stage and component of the assessment process relates to students' progression within a programme.</p>	
Strategy	<p>An explanation should be given of how the programme assessment strategy</p> <ul style="list-style-type: none"> - Links with the programme's intended learning outcomes, learning and teaching strategies - Complements the programme's approach to learning and teaching and the development - Contributes to the development of students' knowledge, skills and capacity for professional practice 	
Student appeals	Information should be provided on the processes an education provider has for managing student appeals.	

Principle 5 Interprofessional education

Opportunities for interprofessional learning with students from other disciplines should be made available in both university and practice settings.

Area	Recommendation	
Inter-professional elements	Information should be provided on <ul style="list-style-type: none">• The disciplines with which learning and teaching will primarily be shared within the programme• The underpinning philosophy of the inter-professional approach to learning and teaching (including how this relates to preparing students for their future practice in health and social care)• How practical and organisational issues to do with the delivery of inter-professional learning and teaching will be managed (including within practice placements)• The balance between profession-specific and inter-professional elements (including how physiotherapy students are enabled to fulfil the outcomes of the CSP <i>Curriculum Framework</i>).	

Principle 6 Practice placements

Each student should experience a balanced sequence of practice placements, representing a diverse range of settings in which they are likely to practise on qualification. The placements should make progressively greater demands in terms of competencies, such that successful completion will ensure graduates can practise as autonomous newly qualified practitioners.

Area	Recommendation	
Curriculum issues	<p>Information should be provided on the following for each block of placements:</p> <ul style="list-style-type: none"> • The overall aims, objectives and intended learning outcomes • Its contribution to developing students' experience in practice settings, environments and specialties that reflect contemporary trends in physiotherapists' contribution to patient care and service delivery • Method of assessment 	
Evaluation	<p>Information should be provided on arrangements for placement evaluation, and how this feedback is used to inform the on-going provision of practice-based learning from</p> <ul style="list-style-type: none"> • The programme team • Clinical educators • Physiotherapy managers • Students 	
Integration in programme	<p>Information should be provided on</p> <ul style="list-style-type: none"> • How theoretical and clinical elements of learning and teaching are integrated within the 1000 hours of learning in the practice environment • The integration of practice-based learning components within the programme as a whole (including an explanation of the staging and progression of placements in relation to students' learning, development of their clinical knowledge and skills, and their professional socialisation). 	
Organisation	<p>Information should be provided on</p> <ul style="list-style-type: none"> • The range, location and provision of practice placements • The criteria and arrangements for selecting placements and monitoring their on-going quality • Arrangements for assigning students to placements, including those with specific requirements (eg relating to childcare, or students with a disability who may need preferential treatment (eg an early placement) and who may need reasonable adjustments to be made (CSP, 2004a; HCPC, 2006) • How the balance of placements completed by individual students will give them exposure to settings that reflect trends in contemporary physiotherapy practice and service delivery • The total number of practice-based placements within the programme and the number of hours of learning in the practice-based environment provided by these • Clinical staff:student ratio(s) for placements, with an explanation of the student supervision approaches and models adopted (CSP, 2006a) • Contractual relationships for practice-based learning with placement providers; the CSP expects institutions 	

	<p>to have a service level agreement with each placement provider, and requests that a specimen agreement is included as part of the programme document</p> <ul style="list-style-type: none"> • Mechanisms for ensuring strong and on-going communication between the host institutions and the providers of practice-based learning opportunities 	
Profile of practice-based learning	<p>It should be explained how</p> <ul style="list-style-type: none"> • Students' overall exposure to different practice settings will help them prepare for contemporary physiotherapy practice, including changes to the structures and environments in which the profession contributes to patient care (CSP, 2005a; CSP, 2006a) • Learning in each setting contributes to students' incremental acquisition of clinical experience that correlates with contemporary physiotherapy practice and their fulfilment of the outcomes of the CSP <i>Curriculum Framework</i> (CSP, 2005a; CSP, 2006a) 	
Student assessment	<p>Students' performance in practice-based elements of a programme should be evident in the degree classification that they receive.</p> <p>While it is at the host/validating institution's discretion as to the proportion of the final classification that is informed by students' clinical performance, the CSP expects this to relate to the notional student effort involved in such a substantial part of the programme (ie this should represent a minimum of 1000 hours of learning).</p> <p>The CSP also recognises that it is at the host/validating institution's discretion whether practice based assessments are graded or awarded pass/fail, the CSP requests that a rationale is provided in support of the respective approach</p> <p>Information should be provided on</p> <ul style="list-style-type: none"> • Arrangements and processes for assessing students' learning in the practice environment, including • Report forms • Details of the assessment of students' clinical skills • Mechanisms for ensuring fairness, consistency and transparency in the assessment of students' learning within and across placements • The assessment regulations that apply to practice-based learning <p>With regard to the assessment regulations that apply to practice based learning the CSP requests that a statement be included that makes explicit that condonement of practice based elements is not normally allowed (CSP 2011). Please refer to Principle 2 section: Programme specific requirements</p>	
Support to clinical educators	<p>Information should be provided on an institution's</p> <ul style="list-style-type: none"> • Support for clinical educators, including induction, liaison and the provision of professional development programmes • Processes for involving clinical educators in programme planning, delivery and evaluation 	

Support to personnel	A programme's delivery should be demonstrably underpinned by resources and activities to support all those involved in developing and delivering its components, including clinical placements	
Support to students	<p>Information should be provided on</p> <ul style="list-style-type: none"> • Resources and processes for structuring, focusing and supporting students' learning in a safe practice environment (including learning contracts, portfolios and distance learning materials) • Student accommodation while on placement • Processes for identifying and negotiating reasonable adjustments for students with a disability (CSP, 2004a; HCPC, 2006) 	

Principle 7 Models of practice

A programme should be based on models of physiotherapy practice that are person-centred, appropriate to the settings and roles in which graduates will practise.

Area	Recommendation	
Models of practice	<p>The programme's professional rationale, philosophies and theories should be explained, together with how</p> <ul style="list-style-type: none">• They are person centred and appropriate to the settings and roles in which graduates will practice• Taken account of local & national drivers and shifts in models of practice (eg public health, Fit for work, management of long term conditions etc) <p>It should be clear how these have informed the programme's planning, development (and delivery and evaluation, in the case of programmes presented for re-accreditation) and in doing so that the programme will meet current and anticipated needs in physiotherapy practice and service delivery</p>	

Principle 8 Research, critical evaluation and appraisal

The programme should support the development of a questioning and evaluative practitioner who has the knowledge and skills to use and gather evidence in practice, and contribute to the discovery of new knowledge.

Area	Recommendation	
Research component	<p>The following information should be provided:</p> <ul style="list-style-type: none">• Explanation of how the research component of a programme enables students to develop and demonstrate the application of a chosen research method, the analysis and interpretation of data and discussion of results achieved and methodology used, and broader skills to do with the critical analysis and evaluation of the outcomes of work• Rationale for the format and assessment of the assignment/project• Procedures and academic support provided to students• Arrangements for standardising marking• Marking criteria• Practical arrangements for managing the impact of research ethics and governance processes on students' ability to complete research-based assignments.	

Principle 9: Resources & programme management

Learning opportunities should be sustained by resources that make their delivery and development viable, and supported by an appropriate programme management that enables and promotes peer review and collaboration, and evaluation of delivery and on-going development.

Area	Recommendation	
Administration	Information should be provided on the host institution's committees that are concerned with the programme's development, delivery and monitoring (eg relevant school and faculty committees), including a diagram that illustrates the reporting structure between them.	
Human resources	<p>The CSP recommends that the overall staff:student ratio [SSR] for a programme does not exceed 1:15.</p> <p>The Society recognises that education providers have different numbers of physiotherapy and non-physiotherapy staff and varying configurations of staff, including lecturer-practitioners and visiting lecturers, who contribute to a programme's delivery. It further recognises that the precise mix of the staff profile impacts on the SSR for a programme.</p> <p>Information should be provided on the configuration of staff who contribute to a programme's delivery and a clear explanation given of how this has been factored into the calculation of the SSR.</p> <p>Specific information should be provided on the SSRs for practical skills sessions, both in terms of the size of practical skills groups and the number of staff covering these sessions.</p> <p>Statements should be provided on</p> <ul style="list-style-type: none"> • The number, type and level of posts (with an indication given of whether they are whole-time equivalent or a portion of this) that support the programme's delivery • Staff roles and responsibilities relating to the programme (including year tutors, personal and professional tutors, admissions tutor, examinations officer, clinical education co-ordinator, equality and diversity tutor, administration and technical and clerical support to the programme's delivery) should be explained • Individuals' other teaching and research commitments, in addition to those relating to the programme being considered • How all those involved in the development and delivery of the programme are supported in their own personal, professional and research development as it pertains to upholding the quality of learning and teaching provision within the programme. 	
Information resources	Information should be provided on students' and staff's access to library, IT and other learning resources (including e-learning materials)	

Area	Recommendation	
Institutional context	<p>It should be explained how the programme fits within the host institution's business plan for its provision of health and social care education (and, for example, its broader initiatives to do with widening access and participation and the delivery of work-based programmes).</p> <p>As part of the above, it should be explained how the programme's development and delivery is linked to that of other programmes and how it links with other schools and departments</p>	
Leadership and management	<p>The overall direction of a programme should directly informed by chartered, HCPC-registered physiotherapists.</p> <p>The programme leader should be a chartered, HCPC-registered physiotherapist</p> <p>Information should be supplied</p> <ul style="list-style-type: none"> • On the broader management structures within the host institution relating to the school or faculty within which the programme is sited • Lines of accountability within the host institution's structures for managing the programme 	
Ongoing evaluation	<p>Information should be provided on the structures, mechanisms and processes the team has in place for evaluating all aspects of a programme's delivery and for gaining the perspectives of all relevant parties.</p> <p>In particular, information should be provided on how the following aspects of a programme's development and delivery are kept under review:</p> <ul style="list-style-type: none"> • How the programme continues to fit within the education providers' profile of physiotherapy and other health and social care education (at qualifying, post-qualifying and support worker levels) 	
Pastoral support	<p>Information should be provided on students' access to</p> <ul style="list-style-type: none"> • Personal tutor and mentoring systems • Counselling services • Accommodation • Sports and recreational facilities • Disability and dyslexia support services • Financial support/advisory services • Health care facilities • Child care facilities 	
Physical resources	<p>Information should be provided on teaching and learning resources, including</p> <ul style="list-style-type: none"> • The number and size of lecture, tutorial and practical rooms • Support facilities for staff and students • Specialist equipment 	

Area	Recommendation	
Student conduct	<p>Information should be provided on the host institution's arrangements (and those that are specific to the programme) to ensure that students are appropriately screened and appraised prior to admission to a programme, and subsequently during their studies, on the standards of conduct that are expected of students on healthcare programmes (particularly in relation to their contact with patients in the practice environment). The CSP sees attention to such matters as integral to programmes that are concerned to develop the professionalism of students and that lead to qualification and registration as a healthcare professional.</p> <p>As a part of programme documentation, a team should supply the policy pertaining to students on the programme that relates to professional conduct and suitability (CSP, 2002b; CSP, 2006b).</p>	
Support to personnel	<p>A programme's delivery should be underpinned by resources and activities to support all those involved in developing and delivering its components.</p>	

Section 3: Physiotherapy framework – entry level and experienced graduate attributes

This Framework directly relates to Principle 1 of the CSP’s learning & development principles.

The Framework (in full) is available via [this](#) link.

The programme’s learning outcomes should be ensuring that the KSBV required of a new graduate are effectively developed through the course. An explanation of how the graduates meet the KSBV articulated within the *CSP Physiotherapy Framework (2010)* should be given (a summary of these can be found in the following table). This could take the form of a mapping exercise.

An explanation should be given of how the learning outcomes are consistent with the programme’s philosophy and rationale.

Where a programme is designed to lead to a Master’s level award, it should clearly be articulated how the programme enables students to develop and demonstrate their learning at this level that should be evident that support the principles on which physiotherapy qualifying programmes should be based in order to obtain Chartered Society of Physiotherapy accreditation.

PHYSIOTHERAPY VALUES

Values are defined as a set of ideals that motivates and informs an individual’s behaviour and actions.

At the heart of physiotherapy practice is a set of values - shared by all CSP members - regardless of their occupational role, practice setting, or level of practice.

The values at the heart of physiotherapy practice are:

- Accountability for decision making and actions;
- Advocacy;
- Altruism;
- Commitment to excellence
- Compassion and caring;
- Fulfilment of duty of care and social responsibility;
- Honesty and integrity;

These values inform the behaviour of CSP members, and the knowledge (theoretical and applied) and skills that the physiotherapy workforce uses and develops.

Knowledge and understanding of physiotherapy	entry-level graduate	experienced graduate
<p>Demonstrate knowledge and understanding that is relevant to their area of practice and that underpins their individual scope of practice The core knowledge of physiotherapy for entry-level practice includes:</p> <ul style="list-style-type: none"> • the structure and function of the human body; • health, disease, disorder and dysfunction; • the principles and applications of scientific enquiry; • the role of other professions in health and social care; • the biomedical, behavioural, physical and social science bases of physiotherapy and how they inform practice; • the theories underpinning the approaches used in physiotherapy practice; • the ethical principles underpinning physiotherapy practice; • the legal and policy frameworks governing physiotherapy practice in the UK. 	<p>practice within complex and generally predictable contexts which requires the application of current physiotherapy knowledge</p> <p>working to consolidate the knowledge gained from qualifying physiotherapy programme</p>	<p>practice within complex and increasingly unpredictable contexts which requires the application of current physiotherapy knowledge.</p> <p>continuing to consolidate the knowledge gained from qualifying physiotherapy programme, and learning how that knowledge transfers from one area of practice to another</p>

Self-awareness	entry-level graduate	experienced graduate
<p>A conscious knowledge and understanding of one's self which is developed through reflective practice.</p> <p><i>Self-awareness</i> describes the behaviour, knowledge and skills required to: identify personal values, preferences and ways of working (eg likes and dislikes; strengths and weaknesses; emotions and prejudices;</p>	<p>demonstrate self-awareness by using reflection on personal practice and feedback from others to identify and articulate their personal values, preferences and ways of working, and with guidance, analyse how these may influence behaviour, judgement and practice.</p>	<p>demonstrate self-awareness by using reflection on personal practice and feedback from others to identify and articulate their personal values, preferences and ways of working, and with guidance, evaluate how these may influence behaviour, judgement and practice.</p>

personal scope of practice), and understand how these can affect the individual's behaviour, judgement, and practice.		
---	--	--

Political awareness	entry-level graduate	experienced graduate
<p>Knowledge and understanding of the political, social, economic and institutional factors shaping the health and wellbeing economy and how they inform the design/delivery of physiotherapy.</p> <p><i>Political awareness</i> describes the behaviour, knowledge and skills required to:</p> <ul style="list-style-type: none"> • identify the political, social, economic and institutional factors influencing the delivery and organisation of health and social care and the design, delivery and development of physiotherapy; • engage with the implementation and development of policy. 	<p>knowledge of the political, social, economic and institutional factors shaping the health and wellbeing economy and how they inform the delivery of physiotherapy across the UK.</p> <p>participate in professional networks and relevant discussions to inform the implementation and development of policies specific to physiotherapy practice.</p>	<p>knowledge and understanding of the political, social, economic and institutional factors shaping the health and wellbeing economy and how they inform the design and delivery of physiotherapy across the UK.</p> <p>contribute to the work of professional or policy networks, relevant discussions and provide feedback to inform the implementation and development of policies relevant to professional practice.</p>

PHYSIOTHERAPY PRACTICE SKILLS		
<i>Profession-specific practice skills</i>	entry-level graduate	experienced graduate
<p>These relate to physiotherapy's scope of practice and primary aim of maximising individuals' movement potential. Approaches that fall within the scope of physiotherapy practice include:</p> <ul style="list-style-type: none"> • manual therapy (eg manipulation, massage, mobilisation techniques); • exercise and movement (eg resisted exercise, functional activity, ACBT, hydrotherapy) • electrotherapeutic modalities • kindred approaches (eg acupuncture, injection therapy) <p>Although an individual's skill-base will evolve according to their experiences and context of practice, physiotherapists must demonstrate how these skills relate to physiotherapy and their personal scope of practice</p> <p><i>Generic practical and technical skills:</i> These practical and technical skills are shared with other workers in health, social care and education eg First Aid, Manual handling.</p>	<p>working to consolidate and refine the performance of complex skills gained from qualifying physiotherapy programme</p> <p>modify a technique in response to feedback (eg from a client, peer, supervisor)</p> <p>evaluate own performance</p>	<p>perform complex skills consistently with confidence and a degree of co-ordination and fluidity, learning how those skills transfer from one area of practice to another.</p> <p>becoming increasingly self-aware of when/how to modify a technique and less dependent on feedback from others.</p> <p>evaluate own and others' performance</p>

BEHAVIOURS, KNOWLEDGE AND SKILLS: FOR INTERACTING AND FOR PROBLEM-SOLVING and DECISION-MAKING		
BEHAVIOURS, KNOWLEDGE AND SKILLS FOR INTERACTING	entry-level graduate	experienced graduate
<p><i>Communicating</i> The interactive process of constructing and sharing information, ideas and meaning through the use of a common system of symbols, signs and behaviours.</p> <p><i>Communicating</i> describes the behaviour, knowledge and skills required to:</p> <ul style="list-style-type: none"> • facilitate the sharing of information, advice and ideas with a range of people, using a variety of media (including spoken, non-verbal, written and e-based); • modify communication to meet individuals' preferences and needs; • engage with technology, particularly the effective and efficient use of Information and Communication Technology 	<p>use a wide range of routine and some advanced communication skills to share information, ideas, problems and solutions, with both specialist and non-specialist audiences.</p> <p>modify communication in response to feedback (eg from a client, peer, supervisor) to meet the needs of different audiences and to enhance user involvement.</p> <p>use a range of ICT to support and enhance practice</p>	<p>use a wide range of routine and advanced communication skills to share specialised information, ideas, problems and solutions with both specialist and non-specialist audiences.</p> <p>becoming increasingly self-aware and able to modify communication to meet the needs of different audiences and to enhance user involvement and collaboration.</p> <p>use a range of ICT to support and enhance the effectiveness of practice</p>

Helping others learn and develop	entry-level graduate	experienced graduate
<p>The process of working with individuals and/or groups to create activities and opportunities to promote learning and development.</p> <p><i>Helping others learn and develop</i> describes the behaviour, knowledge and skills required to:</p> <ul style="list-style-type: none"> • assess the learner's needs and preferences; • design materials/experiences that facilitate learning and development; 	<p>with guidance, plan and deliver learning activities to a specified range of individuals/groups</p> <p>apply appropriate approaches to learning and teaching(techniques and material) to meet learners' needs.</p> <p>with guidance, predetermined criteria to assess a learner's performance and progress and</p>	<p>with guidance, design, plan and deliver learning sessions of activities and opportunities to a range of audiences with similar levels of knowledge and expertise.</p> <p>select and apply appropriate approaches to learning and teaching(techniques and material) to meet learners' needs.</p> <p>use predetermined criteria to assess a learner's performance and progress, and provide them with constructive feedback.</p>

Using evidence to lead practice	entry-level graduate	experienced graduate
<p>The process of analysing, synthesising and evaluating the best- available evidence, and integrating it with individual expertise and service users' needs and preferences to inform practice</p> <p><i>Using evidence to lead practice</i> describes the behaviour, knowledge and skills required to:</p> <ul style="list-style-type: none"> • systematically search for evidence; • critically appraise evidence and use the information to address problems and issues arising in practice. 	<p>with guidance, use a range of approaches and techniques to systematically search for evidence from a variety of sources relevant to the situation.</p> <p>critically evaluate current research and scholarship and with guidance, use the appraisal to address specific issues arising in professional practice.</p>	<p>use a range of approaches and techniques to systematically search for evidence from a variety of sources relevant to the situation</p> <p>critically evaluate current research and scholarship and use the appraisal to address specific issues arising in professional practice.</p>

Section 4: Practical arrangements for CSP accreditation events

CSP reps acting on behalf of the CSP and University in a dual role

It is not possible for an HCPC visitor to act in any other capacity at a particular (re-) accreditation event; this is because the regulatory body understandably requires its representatives to be independent. However, it is possible for you to hold the appointment of CSP representative and to act on behalf of an HEI as an external professional representative at a (re-)accreditation event, as well as acting as its visitor representative. In such circumstances, it is helpful for the Chair and administrative support to be made aware of the dual role prior to the event as this might have an impact on the way the day is managed.

Managing the day

In most cases the CSP does not need a private meeting, and is happy to share discussions with the University panel. Although a short period of time may be needed to allow the conditions to be formulated, this can usually be accommodated within the standard agendas used by the HCPC and CSP. If the situation arises whereby the University's and the CSP's conditions differ, this can be easily managed during the feedback session to the team at the end of day.

CSP expectations of accreditation event itinerary

The event should allow for meetings with the following stakeholders to take place

- senior staff who carry responsibility for physiotherapy education resources and the strategic development of the institution's physiotherapy / health and social care provision
- the programme team
- clinical educator and manager representatives
- student representatives
- service users (where possible)

The event should also include

- Private meetings of the panel to
 - Meet one another, understand members' respective roles, finalise arrangements for the conduct of the event and set a detailed agenda for discussions with programme representatives – at the start of the event
 - Evaluate the progress of the event and coverage of identified areas for exploration – as required during the event
 - Formulate any conditions and recommendations attached to a programme's validation/accreditation - at the close of the event (but prior to providing feedback to the programme team)
- A tour of facilities (both information resources and physiotherapy accommodation)

For joint events involving the HCPC, their required agenda also meets the CSPs needs.

Supporting the programme team during the day

As well as accrediting the programme the CSP can support the programme team, while asserting its quality assurance role. There has been a significant shift in the CSP's underpinning quality philosophy, moving towards a quality enhancement focus. It is hoped that this will allow the CSP to support the continuous improvement of learning and teaching within a programme. For example, the CSP can support the team's defence of

issues such as maintaining appropriate staffing levels or justifying the balance of ensuring academic rigour with fitness to practice requirements. The CSP intends that conditions and recommendations, made at an event, are not burdensome to the programme team but are put in place to help the team provide contemporary, innovative robust qualifying physiotherapy programmes.

Multi-professional events

For this type of event, the CSP asks that arrangements include an appropriate balance between multi-professional sessions and profession-specific ones and are conducted over a sufficient time period to allow due consideration of the multi-professional and profession-specific aspects of the programme. This ensures that the CSP representatives have the opportunity to raise and discuss all their queries about the physiotherapy programme, as well as develop their understanding of the institution's multi-professional ethos and approach to programme delivery.

Section 5: Issues that may impact on a programme's CSP-accredited status

This section explains the processes that the CSP has in place to ensure transparency in its requirements and mechanisms for programme (re-) accreditation and the potential withholding or removal of this

This section explains

- The CSP's staged approach to working with programme providers to address any difficulties they encounter in fulfilling its requirements for (on-going) accreditation
- The sanctions the CSP can apply should it not be possible to resolve a situation more positively within a given timescale
- The Society's appeals procedure.

CSP Approach

The CSP's approach to ensuring that its conditions for accreditation are met, and continue to be met through a programme's life-cycle, are intended to be constructive and supportive. The Society seeks to work with programme providers to resolve any difficulties, or potential difficulties, that may impact on their ability to deliver accredited programmes effectively.

The rationale for ensuring adherence to CSP requirements for accreditation is to

- Ensure the quality of students' learning experience
- Ensure students' preparedness for contemporary physiotherapy practice and for delivering high-quality patient care
- Uphold CSP standards for qualified, chartered membership
- Preserve the integrity and credibility of the Society's quality assurance arrangements.

Issues arising at the point at which a programme is considered for accreditation or re-accreditation

It is standard within validation and accreditation processes for there to be scope for conditions (and recommendations) to be attached to the recognition of a programme (including by the validating higher education institution and relevant regulatory and professional bodies involved in its accreditation). The CSP expects any conditions attached to a programme's validation and accreditation to be made on a collective basis by the validation/accreditation panel charged with considering the programme. However, it reserves the right to attach conditions to its specific accreditation of a programme that may not be agreed by the panel as a whole.

Any conditions that the CSP sets will be in keeping with its requirements as set out in Section 3 and ultimately concerned with ensuring that students' learning experience will be of an appropriate quality and that students' learning will be assessed in ways that enable them to demonstrate fulfilment of the *Curriculum Framework* outcomes.

If the CSP does feel the need to set conditions that are specific to its accreditation of a programme, it will seek to work constructively with the programme team to achieve fulfilment of the condition as quickly as possible. It will do this by providing detailed guidance on its requirements and advice on how these can be met.

Where conditions are attached to a programme's validation and/or accreditation, the CSP requires these to be met *prior* to a programme's delivery. If a situation arises in which this is not possible, CSP accreditation of the programme will be "pending". This should clearly

be indicated as such by the host institution, including to students. Again, the Society seeks to provide on-going support to the programme provider in addressing and resolving the issue to which the condition pertains as swiftly and smoothly as possible [see below].

Questions relating to fulfilment of CSP requirements once a programme has received accreditation

The CSP recognises that issues may arise once a programme has received its accreditation that may impede the provider's ability to fulfil the requirements for professional body accreditation [see Section 6]. It further recognises that these may be due to extenuating circumstances (including issues to do with changes and reductions in staffing and placement provision) that are beyond the programme provider's direct control.

The CSP is keen to help the provider address any problems that arise as swiftly and smoothly as possible. Again, this is primarily to ensure the quality of students' learning experience and achievements is not compromised.

Other reasons why a provider's fulfilment of CSP requirements for programme accreditation may be brought into question are as follows:

- If there is an apparent deviation from the programme and details of its delivery and regulation as agreed at the point of accreditation (including any requirements that had to be met as a condition of accreditation)
- If there is non-compliance with CSP annual quality review processes [

Again, the CSP seeks to work constructively with a programme provider, where such issues arise, to resolve these issues through a staged process and on-going dialogue.

A staged process

The CSP seeks to implement a staged process to working with a programme provider to address an issue that may bring into question a programme's on-going eligibility for CSP accreditation. This is outlined below.

Process for working with a programme provider if questions arise about a programme's on-going suitability for CSP accreditation

This process could be triggered by a number of sources, including (but not exclusively) - members of the public, a student/student body or the provider themselves.

This process will be triggered should any of these parties notify the CSP of an issue relating to a programme that may raise questions about its on-going fulfilment of the Society's requirements (guidance on planned and unplanned changes to a programme are provided in the main document). This process will also be triggered if the CSP becomes aware of an issue through its monitoring or accreditation processes (or non-compliance with these).

Stage 1: A CSP officer notifies the programme provider that the Society has concerns, outlines these concerns and indicates its wish to work constructively with the institution to resolve the situation as soon as possible, with a clear indication given of the information or action that it requires from or by the provider.

Stage 2: If most constructive to resolving the issue, the CSP will seek a meeting with the programme provider (involving a CSP representative and officer); otherwise, advice and guidance on meeting the requirement will be provided by telephone and email

Stage 3: The CSP requires notification from the programme provider as to how the problem or difficulty has been resolved, with documentary evidence submitted in support of this.

Stage 4: The CSP, via its committee structure, considers the evidence supplied by the programme provider.

Stage 5: The programme provider is informed as to whether CSP requirements for on-going accreditation have been met, or whether it requires further information to be supplied or action taken.

Stage 6: If the matter is not resolved at stage 5, stages 2 to 4 will be repeated.

Stage 7: If the matter is not resolved through this secondary process, the CSP, via its Quality Assurance and Enhancement Network, will consider whether it has to move to implementing its sanctions [see section below: **Sanctions**].

The CSP attaches timescales to the stages outlined above, in negotiation with the programme provider.

A schedule is drawn up with a programme provider that indicates

- By when the CSP requires a response on the specified matter(s) of concern (allowing for the potential for extensions to be granted in exceptional circumstances, where this would not be severely detrimental to the quality of students' learning experience and outcomes)
- The timescales within which the CSP will respond at each stage.

Sanctions

Only if the staged approach to supporting a programme provider does not result in a situation being resolved satisfactorily does the CSP move to implementing a series of sanctions. The purpose of enacting sanctions is to

- Safeguard the credibility of the Society's quality assurance processes and the standing of its criteria for membership
- Institute a formal process through which it can seek to continue to work constructively with the programme provider to resolve the difficulties that have arisen.

The CSP implements its sanctions with extreme caution; their use is only triggered if a supportive, discursive approach with a programme provider has been unsuccessful.

CSP sanctions are listed below.

- The CSP indicates its accreditation of a programme remains pending until a specified matter is resolved (for whichever student cohorts the matter in question related); in such a scenario, the CSP will wish to keep the situation under review and to try to achieve resolution at the earliest opportunity
- The CSP issues a temporary suspension of a programme's accreditation (for whichever cohorts an issue relates), with conditions set for accreditation being regained; again, the Society will seek to work with the programme provider to try to ensure the conditions set can be met within the specified timescale

- The CSP withdraws a programme's accreditation (for whichever cohorts and issue related) and sets conditions that need to be met through submission of a revised, or differently resourced, programme for accreditation.
- Should the causes for concern remain unresolved and be of a suitably serious nature, other partners (i.e. regulatory bodies or clinical partners) may need to be alerted. In order to make this decision, the CSP will make it based on whether the programme's continuation has the potential to cause danger to students, staff and/or patients. The outcome of the decision to involve other parties would be known to the programme involved.

Criteria

In considering cases in which a question is raised about a programme's on-going eligibility for CSP accreditation, the Society takes the following into account:

- The extent to which the unresolved issue risks the quality of students' learning experience in line with the CSP requirements
- The extent to which the unresolved issue potentially jeopardises students' demonstrable fulfilment of the outcomes of the *Learning & Development Principles* (CSP, 2010)
- The programme provider's evident commitment to addressing and resolving the issue that has arisen and its attention to deploying contingency measures to minimise its impact (particularly in relation to the first two bullet points)
- The programme provider's evident commitment to fulfilling CSP requirements of accreditation.

Appeals

The CSP is keen that its decision-making processes to do with programme accreditation (as with all areas of its quality assurance activity) are fair, consistent and transparent. A programme provider has the right appeal if it believes

- A CSP decision to withhold or remove its accreditation of a programme is unfounded
- The guidance received to address the point of concern was unclear
- The time taken to address the matter original point of concern was not appropriate.

In such a scenario, the programme provider should communicate in writing to the Director of Practice and Development. The letter should explain why it believes that an unsound decision has been made. Such a statement will be considered through a panel created by the Education Committee.

Section 6: QAE group

The QAE Group has a broad remit for CSP quality assurance and enhancement activity to do with education at all levels that has relevance to CSP members. It oversees operational activity for all types of CSP programme recognition (accreditation/re-accreditation, endorsement and the new CSP quality mark) and advises on their development.

Current projects and activities:

As indicated above, the QAE Group undertakes a mix of activity, including oversight of operational activity and developing the CSP's quality assurance/enhancement role.

Current operational activity includes the following:

- All matters to do with the quality assurance/enhancement of qualifying programmes (including periodic re-accreditation and annual quality review)
- All matters to do with the quality assurance/enhancement of post-qualifying programmes (including endorsement/re-endorsement and new annual quality review processes).

Current project-style activity includes the following:

- Developing the CSP's new quality mark for application to a broad range of learning opportunities, following the recent pilot exercise
- Piloting criteria and processes for considering support worker programmes for CSP endorsement
- Development of the range of programme recognition that the CSP confers (including exploration of the potential for the CSP to use its quality mark to confer appropriate recognition on programmes delivered overseas)

Managing business

The group fulfils its remit through a range of activities. These include

- Standard-style business meetings (three times a year, scheduled to allow reports to the CSP Education Committee)
- Workshop-style sessions (particularly to ensure its effective progression of its responsibility for achieving a genuine cohesion of activity across the learning continuum)
- Regular e-mail contact to expedite business, where appropriate, between its meetings
- Scheduled opportunities for the group to meet with CSP representatives/scrutineers and education providers.

Terms of reference for the Quality Assurance and Enhancement [QAE] Group

The Quality Assurance and Enhancement Group [QAE Group] oversees all operational activity to do with how the CSP exercises its quality assurance and enhancement role across the spectrum of learning relevant to CSP members (qualified, associate and student).

The Group also advises the CSP Education Committee on the development and successful implementation of the CSP's quality assurance/enhancement role.

The Group submits recommendations arising from its operational role and the development of the CSP's quality assurance/enhancement to the CSP Education Subcommittee for accreditation.

The Group has the following key responsibilities:

- Seeking to maintain and raise standards of education across the learning continuum, within a context of changing population, service and workforce need
- Encouraging developments and innovation in physiotherapy education across the learning continuum, again in response to, and in anticipation of, changes in population, service and workforce need across the health care economy
- Overseeing the development and implementation of the CSP 'hierarchy' of recognition of education provision and nurturing CSP relationships with key stakeholders in exercising its quality assurance/enhancement role.

In addition to undertaking its operational role to do with the quality assurance/enhancement of physiotherapy education at levels relevant to all members, the group does the following:

- Keeps under review criteria and arrangements for exercising the Society's quality assurance/enhancement role and advising the CSP Education Committee on required refinements or modifications
- Maintains an overview of broad developments and trends in physiotherapy/ health care education and ensures these inform the development of CSP quality assurance and enhancement activity
- Maintains an overview of developments in the quality assurance/ enhancement of health and social care education, including the processes of host education providers, the Health Professions Council, government departments and agencies (including education commissioners) across the UK and other professional bodies, including to identify the scope for greater collaboration and partnership-working
- Maintains links with other CSP quality assurance and enhancement activity (relating to practice and research) to help identify the scope for achieving stronger integration of different areas of CSP work to optimise the effectiveness, impact and profile of activity.

Membership of the group

The group's membership provides the following:

- The necessary breadth of expertise and experience to fulfil its terms of reference and to capture the full range of perspectives relevant to its activities
- The capacity to organise itself as sub-groups to address elements of operational work.

The group comprises the following members:

- One representative of CSP Council
- One representative of the CSP Education Sub-committee
- One representative of the CSP Practice & Service Delivery Sub-committee
- One representative of the CSP Research & Development Sub-committee
- Two members of the CSP Education Forum
- One member of the CSP Practice Educator Forum
- One member of the CSP Admission Tutor Forum
- Two CSP members who act as CSP representatives/scrutineers within its quality assurance/enhancement processes
- One representative of the CSP accredited clinical educator [ACE] scheme steering group
- One member of the CSP Equality & Diversity Group
- Two representatives of CSP Clinical Interest/Occupational Groups [CI/OGs]
- One representative of the CSP Physiotherapy Associates Board
- One representative of the CSP Student Executive Committee
- One lay representative (via the CSP Regulatory Board).

The Group can consider co-opting an additional two representatives to ensure an appropriate balance of membership to manage its workload.

The group's membership must provide a UK-wide perspective. The membership will therefore be configured to ensure that, within the composition of the group, there is representation from all 4 countries. Should this not be possible to achieve, the group may co-opt additional members to ensure that this is achieved.
