Have you been redeployed due to Covid19?

What is your redeployed role?

ITU Physio

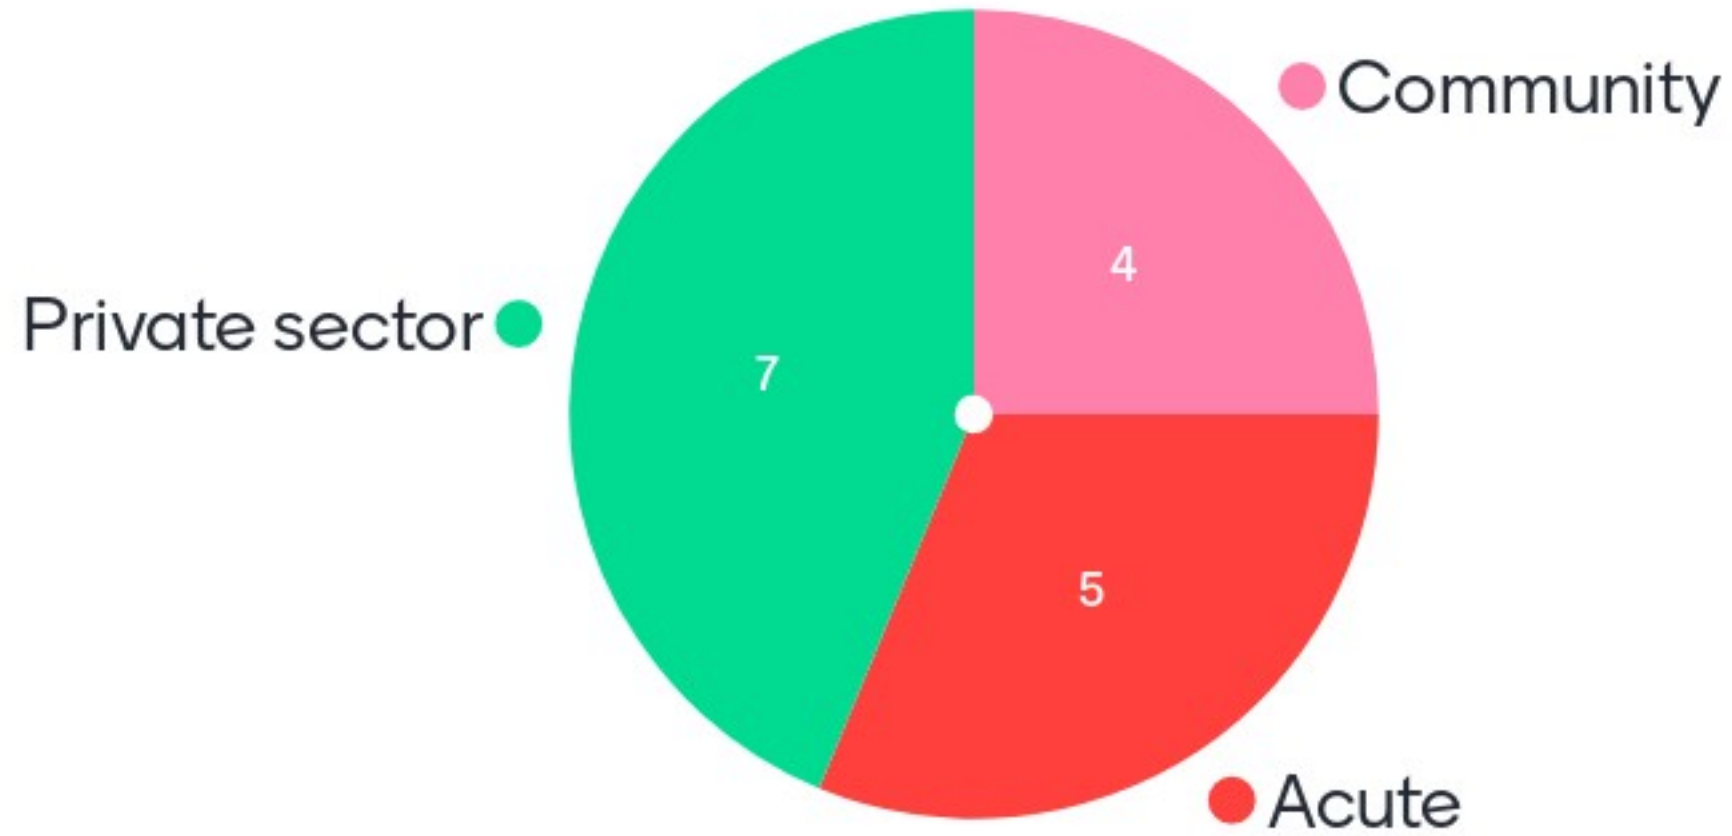

Respiratory - working on ITU

Not applicable

Not change. Com physio

What part of the healthcare system do you normally work in?

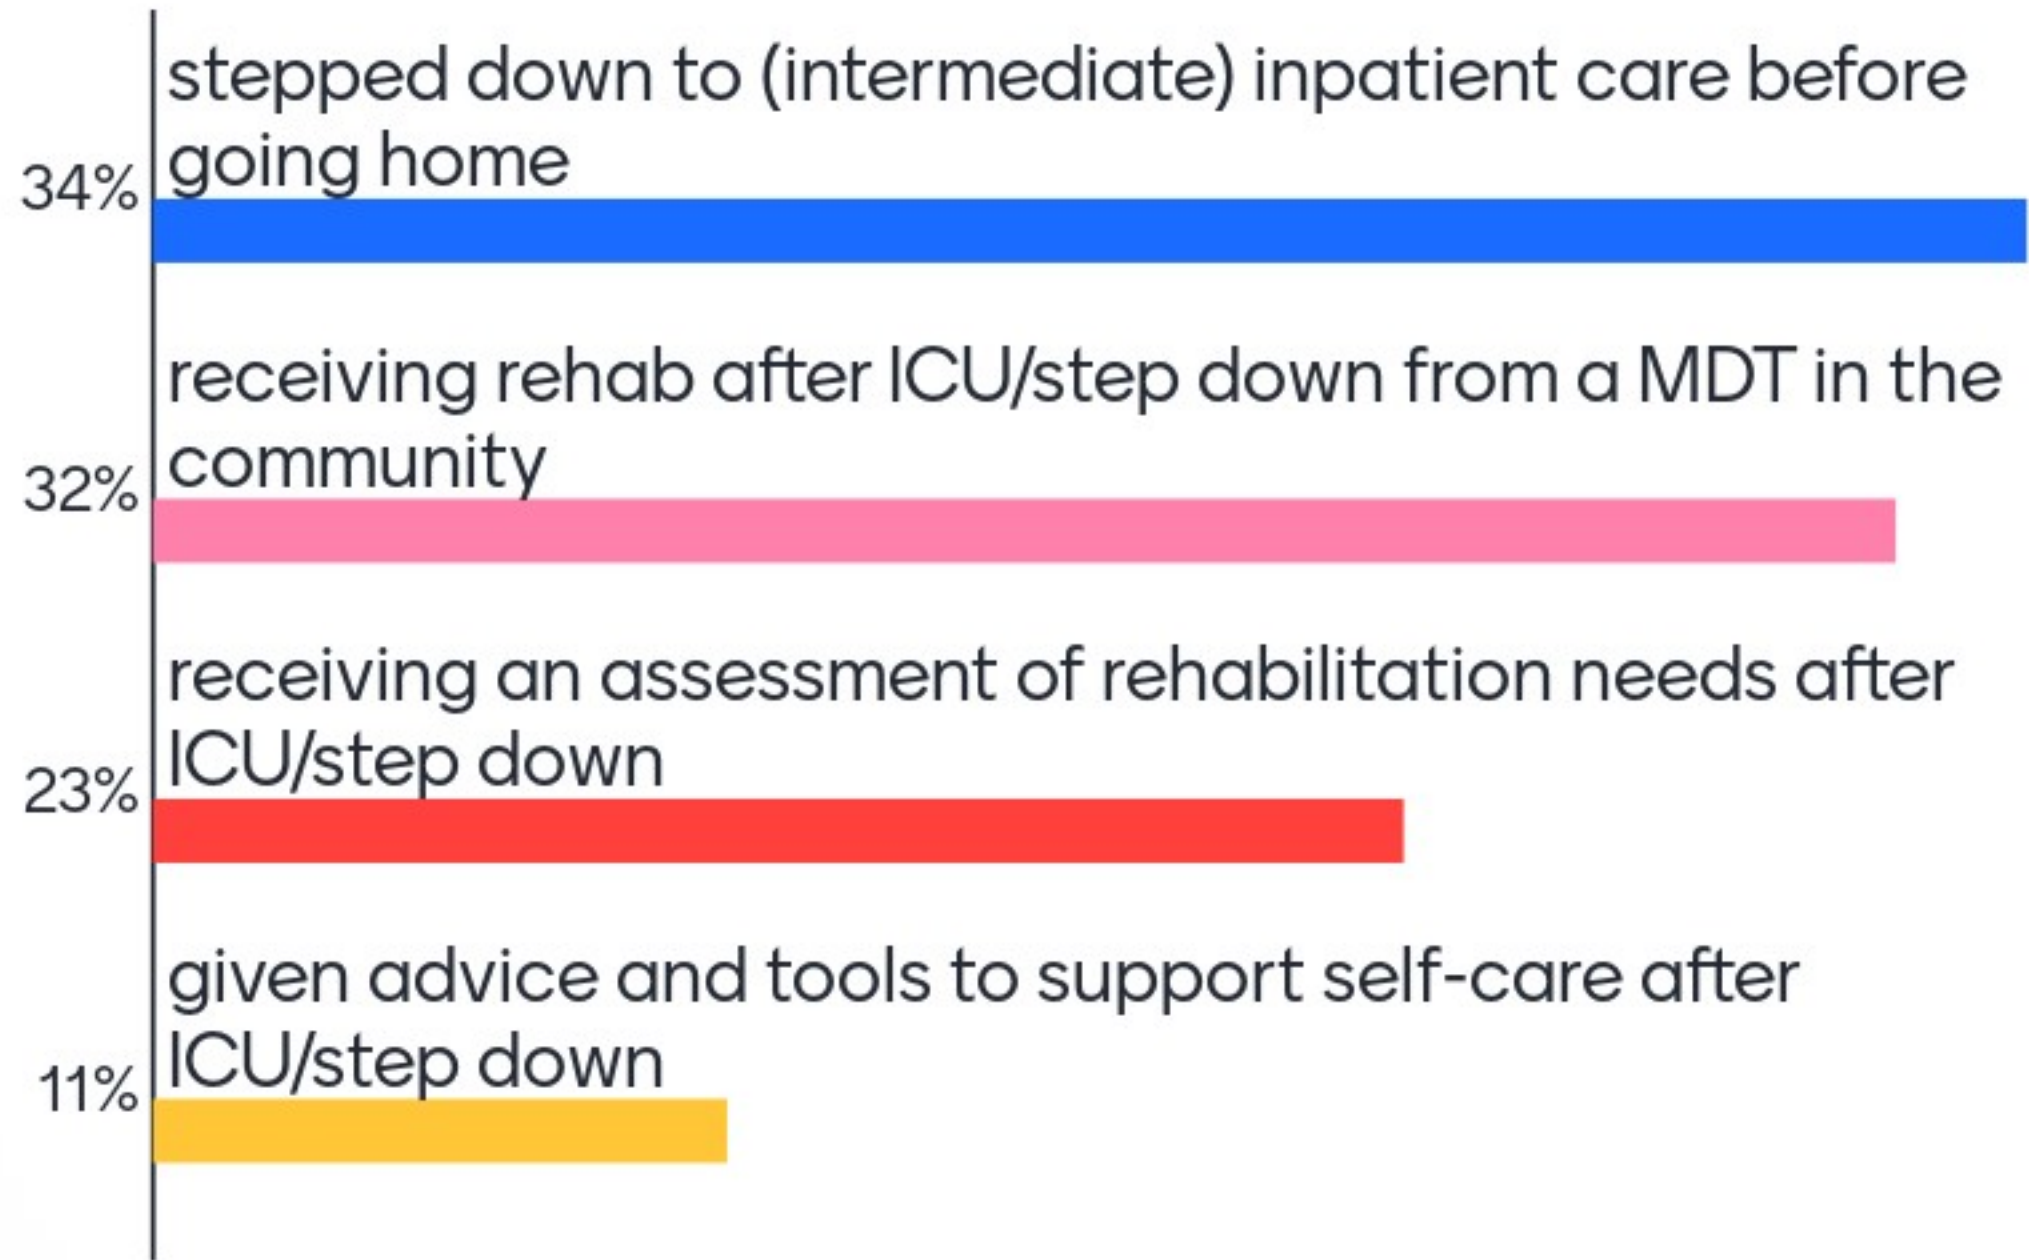

How much do you agree with this statement?

Covid survivors are currently receiving the rehabilitation they need after discharge from ICU

3.8

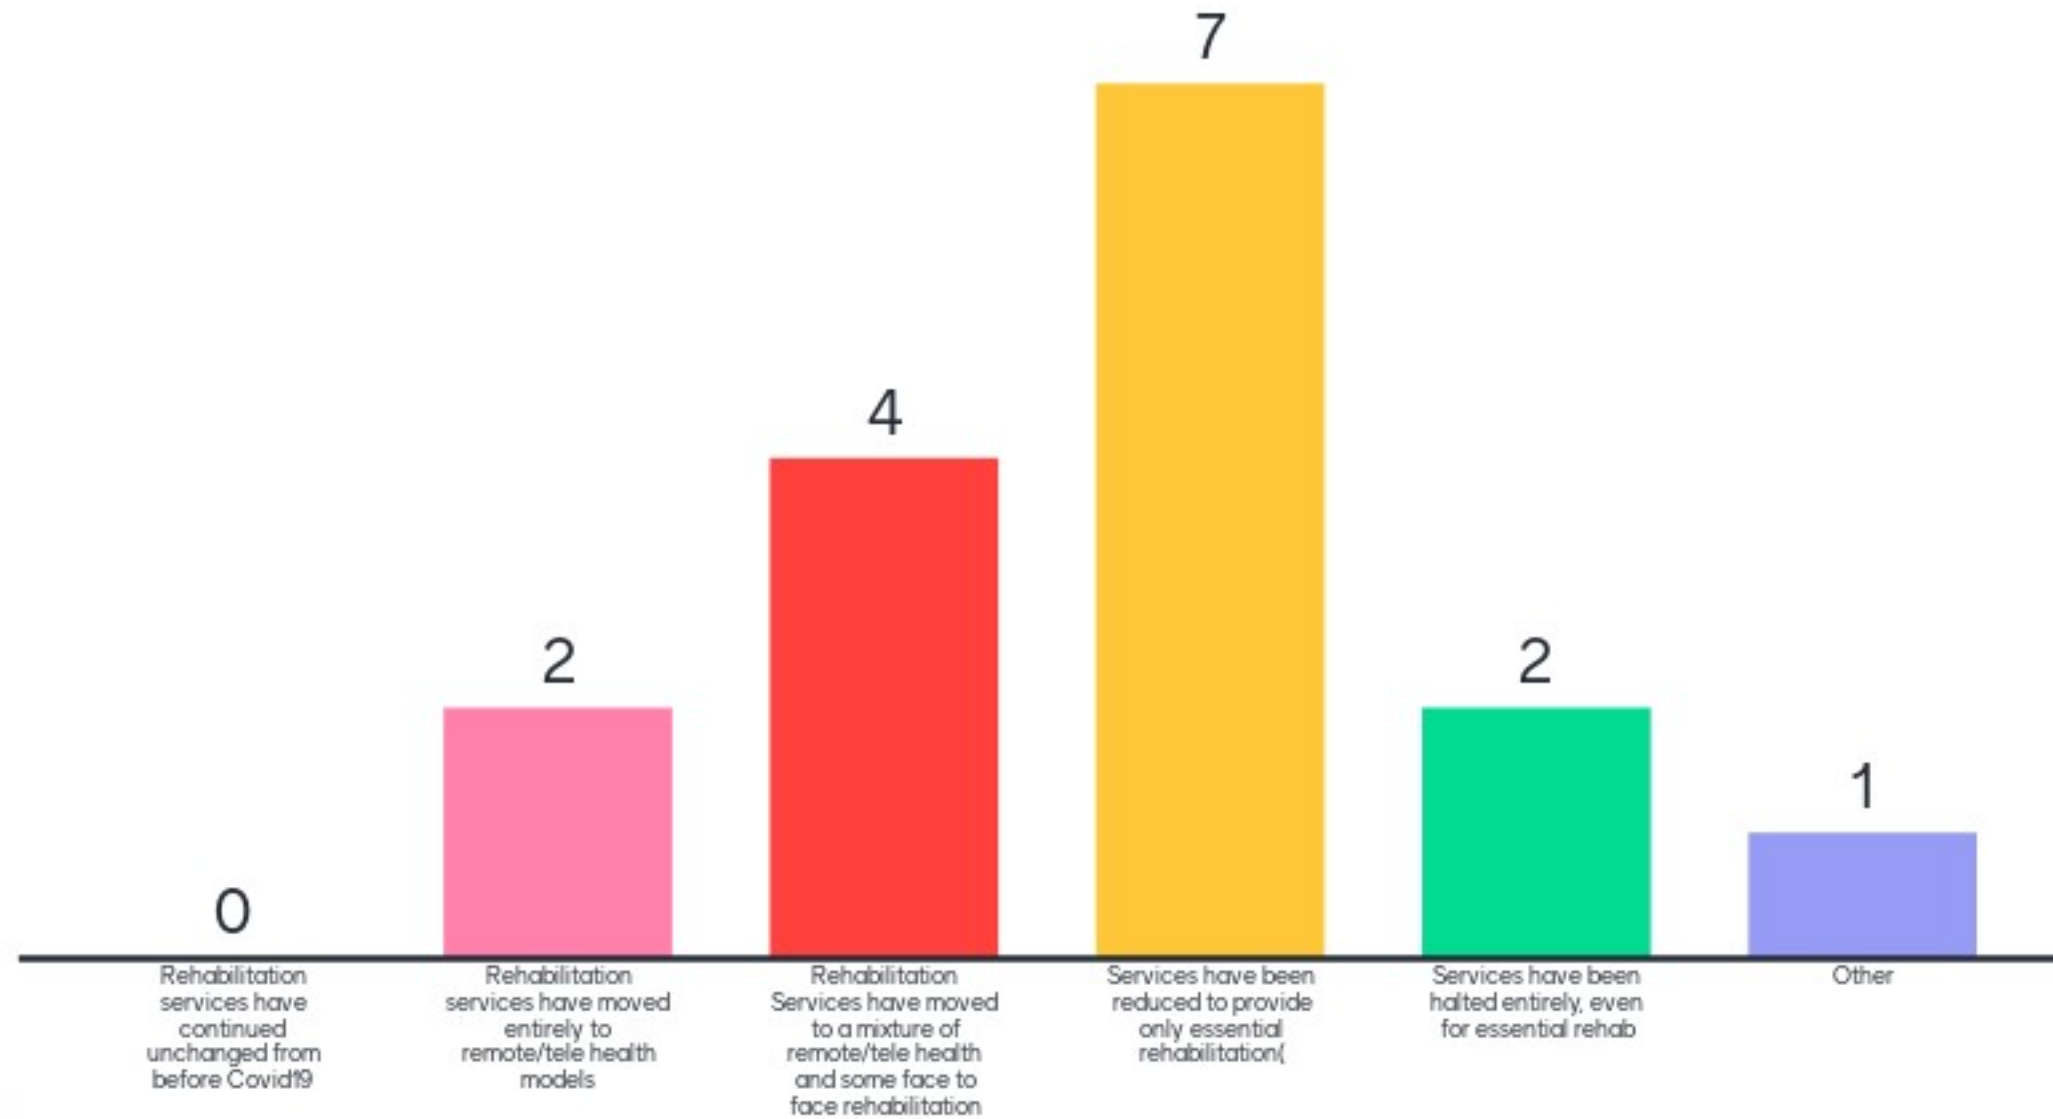

In your experience/ opinion, what percentage of patients recovering from COVID19 and discharged from ICU should be:

In your opinion/experience, what of these are issues that are stopping covid19 survivors from having the rehabilitation they need?

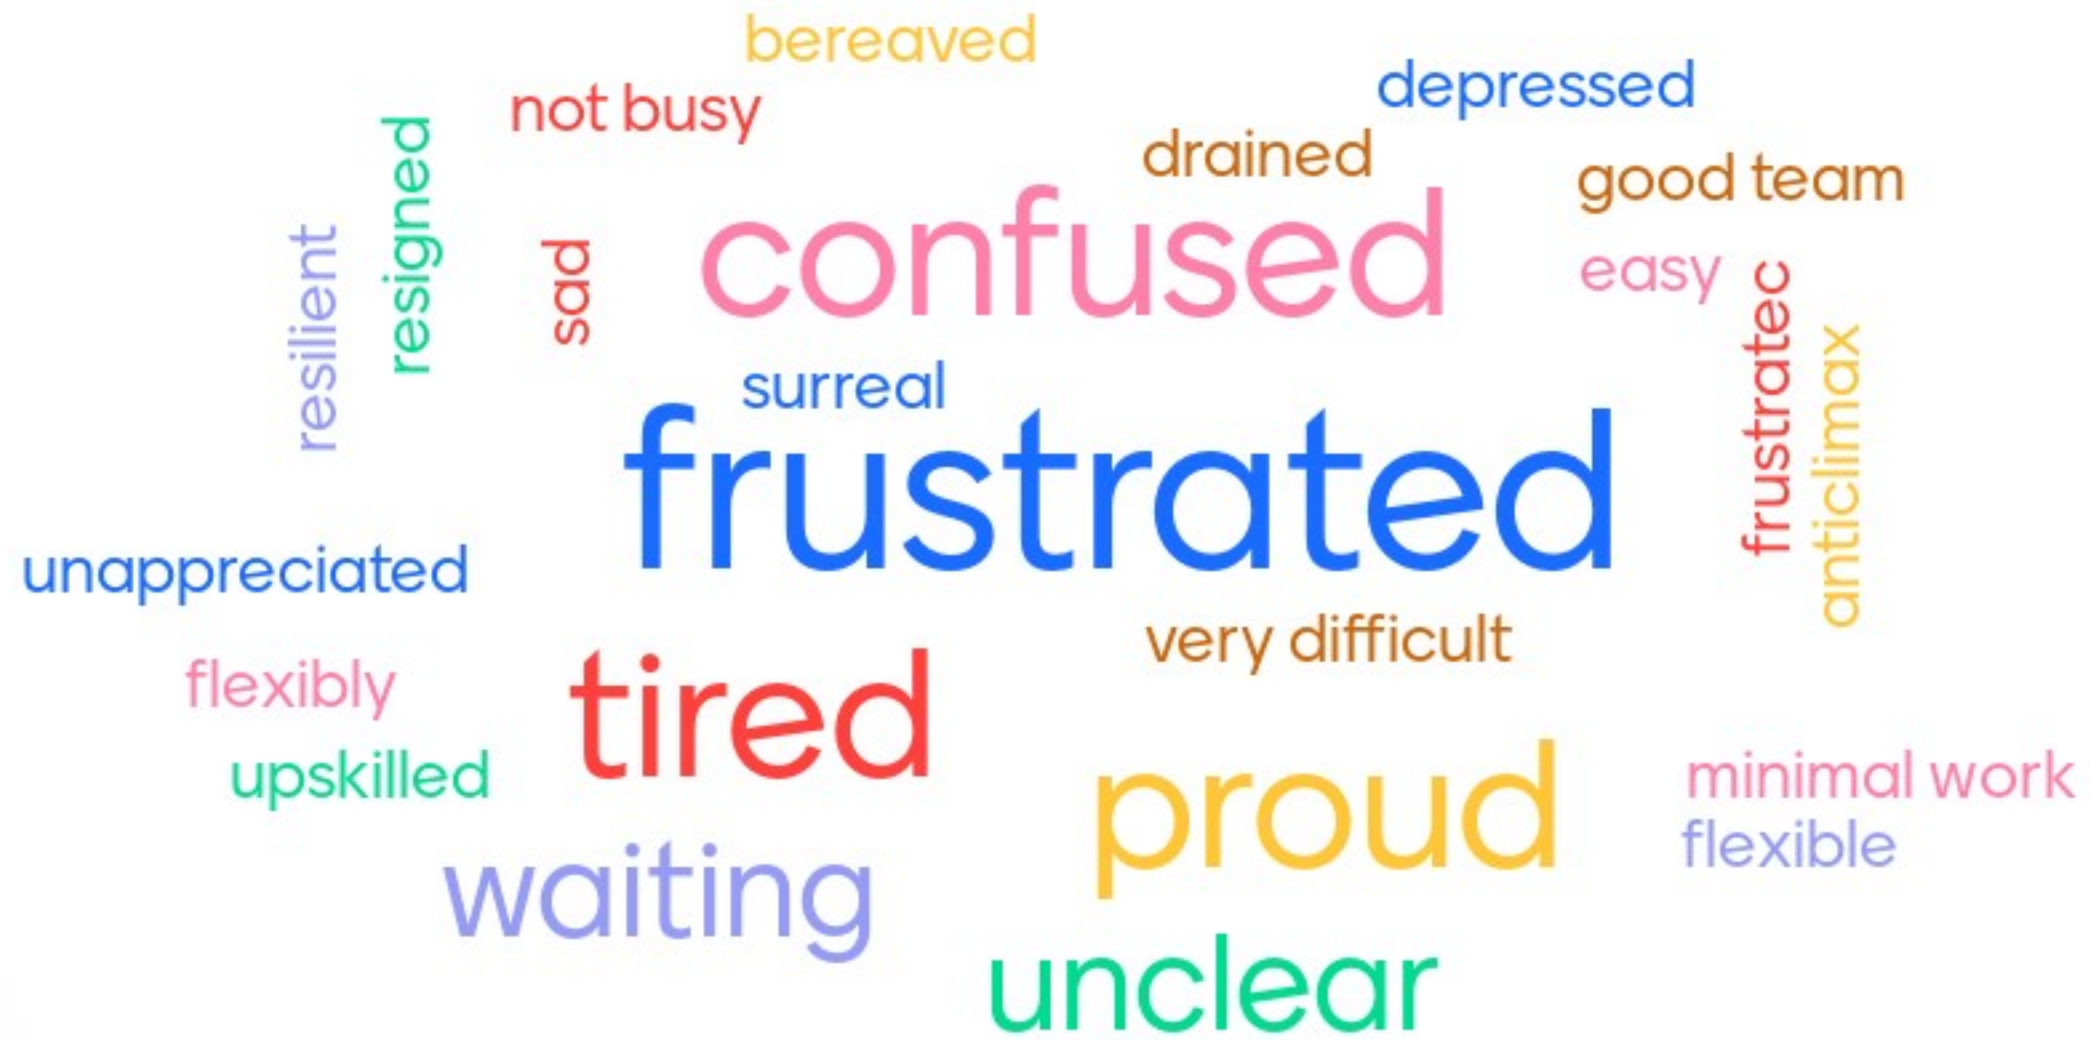

How are essential rehab needs being met for people WITHOUT Covid19?

If services halted entirely which of these are a factor (pls rank)

Now a few weeks in, how do you feel you are managing during the pandemic?

Is there a particular topic you would like to see covered tonight?

Rehab! What and when and why?!!

What is essential Rehab?

Where are all the other unusual patients. Are they suffering at home scared to come in?

Thoughts on how rehab can progress in the (hopefully) near future

What is determined as essential rehabilitation?

Impact on non covid patients

Ideas on how to return safely to outpatients private MSK physio

How one man band private practitioners can get back to work

What are the opportunities to be created from this for physio?

Is there a particular topic you would like to see covered tonight?

What is essential rehab

What areas of rehab will resume first?

Private Msk clinics the present and future of our business

Method of delivering visits (not face ro face) for those without available media or skills to use devices

How we retain innovations vs cost of potentially providing the innovation.

When would we be able to open up my private MSK clinic if I work home?

Currently we are seeing all of our patients, using remote consultations. When we are able to see patients F2F will we need PPE
